
Highrise Consulting, Inc. (www.highriseconsulting.com) is seeking an experienced **Configuration Management Specialist** (8+ years) to support the maintenance, ongoing stability, and continuous operations of a very large, complex enterprise level system. The ideal candidate will have experience managing COTS and OSS products and automating general configuration management tasks. He/she will be expected to design and implement CD/CI solutions using COTS and OSS products. He/she must have very strong interpersonal and communications skills to effectively communicate and collaborate with System Engineers, Architects, Operations, and Service Desk staff.

To apply, send resume to architect@highriseconsulting.com please include ["Systems Architect Job" in quotes] as a subject of your email.

Referral Bonus: \$2000 (candidate must be continuously employed with Highrise for 3 months).

Primary Responsibilities:

- Perform all hands-on activities required by the software configuration management processes for large enterprise systems, including builds, checkout, approval, software promotion, and deployments.
- Manage, administer and maintain Atlassian suite of projects to include, but not be limited to Git/Stash, Jira Agile, Jira Portfolio, Confluence.
- Create and manage on-premise software repositories using Artifactory or similar tools and support build JEE systems integration using Ivy scripts.
- Create and manage enterprise scale software continuous delivery systems using COTS/OSS platforms such as Jenkins to enable integrated build, verification, testing, and release process.
- Evaluate and propose adoption of these new tools and technologies; and support the planning and deployment of tools/technologies selected for deployment.

Basic Qualifications:

- 8+ years of experience providing SW Configuration Management, Release Management, and Documentation Control (or 6+ years with a Master's Degree).
- A minimum of 4 years' experience implementing, operating, and maintaining SW configuration and control tools (e.g., Jira, Stash/BitBucket, Artifactory, etc.).
- A minimum of 4 years' experience supporting a large (10+ development teams) community in the usage of an Atlassian suite of products for change control and agile development, including assisting development teams in identifying and resolving issues related to software build, release, and deployment using JEE build stack based on tools (e.g. Ant, Ivy, Gradle, npm).
- A minimum of 4 years' experience implementing integrating existing and new tools and controls, such as static (SonarCude, XRay) and dynamic (AppScan, NetSparker) code analysis and security scanning software products, into enterprise software continuous delivery to ensure product quality.
- In-depth knowledge and experience using and integrating products such as Stash/BitBucket, JIRA, Jenkins or their equivalent, preferably using open-source products and services.
- Hands-on experience with day-to-day administration tasks to support CM tools running on Linux and Windows operating systems.

-
- Excellent interpersonal and communication skills, with experience working in a highly collaborative on-site environment.

Preferred Skills/Experience:

- Experience working in Agile environment.
- Proven experience evaluating, planning, and implementing adoption of these new tools and technologies.
- Proven experience preparing and presenting technical documentation to various audiences.
- Ability to work on multiple assignments or projects in parallel, balancing time and schedule based on the business priorities of the organization.
