

Highrise Consulting, Inc. (www.highriseconsulting.com) is seeking Infrastructure Security Engineer to work onsite full time at NIH (National Institutes of Health) facility in Bethesda, MD (Rockledge Drive Campus). To apply, send resume to Roman Tokman - rtokman@highriseconsulting.com - please include ["Infrastructure Security Engineer Job in quotes"] as a subject of your email.

Referral Bonus: \$2000 (candidate must be continuously employed with Highrise for 3 months).

Responsibilities

- Responsible for identifying, monitoring, and defining the requirements for the overall security of infrastructure systems
- Responsible for securing and monitoring Windows and Linux servers on-premise and in the AWS
- Evaluate, design, and implement secure solutions for networking, authentication, and authorization with the latest security and infrastructure technologies
- Perform infrastructure, network, and storage security scans. Interpret results and remediate security risks and vulnerabilities. Assess threat advisories to determine vulnerability and impact to the enterprise
- Troubleshoot security related issues: firewalls, switches, physical and virtual servers
- Recommend, document and implement policies and procedures to ensure adherence to security standards
- Collaborate on multiple security-related projects and technologies, interfacing with team members within the organization as well as other developers and external customers/partners
- Participate in the monthly on-call rotation to support the production environment 24/7
- Manage projects and tasks in JIRA
- Generate and maintain security dashboards, reports, and profiles to track the overall infrastructure health and status of the information systems

Qualifications

- 5+ years of Infrastructure Security experience and administering enterprise or government systems, storage and network in security practices, configurations, and standards. Demonstrated experience in finding and remediating vulnerabilities
- Expert level knowledge of information security policies, controls, and processes as well as infrastructure (networks, servers), databases, and Internet technologies including security configurations, log analysis, intrusion detection and mitigation
- Expert knowledge of cloud (AWS) cybersecurity concepts, including threats, vulnerabilities, security operations, encryption, boundary defense, auditing, authentication, and risk management
- Strong understanding of common network protocols: UDP/TCP, DNS, SSL, TLS, HTTP/HTTPS, FTP, and SSH
- Knowledge of information security control practices and frameworks (e.g., CIS CSC, OWASP, NIST, FISMA)
- Experience working with security tools including Tenable, Tripwire, CarbonBlack, Splunk, Cylance and BigFix
- Technical writing skills to develop and maintain security documentation
- Excellent organizational, analytical and problem-solving abilities

Education:

- Bachelor's degree or equivalent work experience
- Security certifications (CISSP, CEH, Security +)
- Knowledge of Grants Management and Health Care related support activities, processes, and regulations are preferred

Clearance: Must be able to obtain a Public Trust
